

**DuraFlex**®

STREETS AHEAD

M7

## *How it all started...*

*“35 years ago I was involved in manufacturing metal lids and bins and felt there must be a safer and better solution for containing rubbish and waste. Today, DuraFlex not only leads in design and manufacturing of Waste lids and bins but I’m proud to say that with the hard work and dedication of our amazing staff, is **STREETS AHEAD.**”*

*Craig - CEO, Container Components Europe Ltd*

STREETS AHEAD OF THE COMPETITION

# ABOUT US...

Container Components Europe Limited pioneered the introduction of plastic lids in 1984.

We now manufacture over a million lids each year at plants in Atlanta, GA and Jonesboro, AR, in the USA and Chesterfield in the UK and have expanded distribution globally now reaching all 5 continents. Originally replacing metal lids, a significant cause of serious injuries and even fatalities, we have played a key role in making the waste industry a safer working environment.

Uniquely focused on the supply of plastic lids for the global waste market, CONTAINER COMPONENTS EUROPE LIMITED have made major investments in the latest design technology, research and development, personnel training

and in-house manufacturing capabilities to meet the challenges of the industry both now and in the future. Worldwide, the brand name *DuraFlex*® is synonymous with quality and innovation.

We deliver to virtually all the world class container builders, plastic injection moulders, as well as the top waste contractors, repairers and local authorities.

We are excited to announce our new addition, the *DuraFlex* EN840 approved metal bin and with our wide range of accessories and other lid options, *DuraFlex* now provide complete solutions for all environments.

# ENVIRONMENT...

Taking the environment seriously

## 1100 L *DuraFlex* bin reverse recycling lid

- Lid has additional ribs for optimal strength
- Tamper proof end caps to retain hinge bar
- For security equipped with CCE patented *DuraFlex* Press2Lock or can be fitted with security posts

## 770 L *DuraFlex* bin recycling lid with brushes

- Lid flap easily interchangeable with choice of options
- Lid flap can be independently locked for extra security
- Lid has high dome for added strength
- Lid sloped at front to assist water drainage

# ENVIRONMENT...

At the heart of what we do

## 770 L *DuraFlex* bin recycling lid with flap

- Lid flap easily interchangeable with choice of options
- Lid flap can be independently locked for extra security
- Lid has high dome for added strength
- Lid sloped at front to assist water drainage

## 770 L *DuraFlex* bin recycling lid with rubber flap

- Rubber flap enables depositing of paper without the need to touch the bin or flap
- Lid has high dome for added strength
- Lid sloped at front to assist water drainage

# ACCESSORIES...

Hardware, accessories and spare parts

## 1100 L bin base

- Replacement bin base with thicker steel for longevity
- Embossed bottom to retain shape and add strength
- Drain plug hole positioned at front of bin for ease of access
- Unique castor bracket design is up to 3 times stronger than the industry standard

## Castors/drain plugs/hinge bars & brackets/locks & keys/danish handles

- Comprehensive range of quality accessories for lids and plastic and steel bins
- Cost effective prices
- Fast delivery

# INTRODUCING...

The **NEW** *DuraFlex* metal bin EN840.  
The stronger trade solution.

After 25 years of undisputed leadership in the global waste container lid and hardware market, Container Components Europe is bringing its unrivalled engineering expertise to its *DuraFlex* Bin range.

The *DuraFlex* Bin EN840 offers a number of newly-incorporated features that make it the most robust standard specification bin on the market. Moreover, the range has been designed to fully integrate with CCE's world-famous *DuraFlex* range of trade waste and recycling lids, giving customers an unbeatable

combination of durability and operational flexibility.

The *DuraFlex* bin EN840 offers the highest standard product specification available on the UK market.

#### **The bin features:**

- 1.7mm\* thick galvanised steel body,
- Fully internally seam welded to prevent liquid ingress and rusting.
- 2.0mm\*\* base thick galvanised steel, 20% more than standard specification of other brands of bin, to prolong container life and avoid unwanted refurbishment costs.

The *DuraFlex* newly designed lifting comb is manufactured from 2.0mm\*\* thick galvanised steel and features

7 gussets for additional strength.

CCE's unrivalled expertise in waste container applications is reflected in our standard product specification. Danish handles, CCE's in-house designed hinge and bracket set, our patented lock and EN840 castors (2 swivel, 2 brake) are all included in the basic container price.

All *DuraFlex* bins are supplied with your preference from the world's largest selection of trade waste and recycling container lids, expertly manufactured at our dedicated plant in Chesterfield where we have manufactured over 4 million lids since 1994.
